[LinkedIn](#) || [GitHub](#)

I am a junior MERN stack developer. I have developed a few more websites featuring React, Node.js, Express.js and connected the MongoDB database to the Express server for the backend management. I have worked with CSS frameworks such as Bootstrap, Tailwind CSS, Material-UI for making websites responsive.

PROJECTS

Alluring Perfumes

[Live Website Link](#) || [Client-Side Code](#) || [Server-Side Code](#)

- This is a full-stack niche perfume project
- Different dashboard access for users and admins
- Functionality - (firebase password-based authentication system implemented, react, react-router, custom hooks, context API applied)
- Node(Express) server connected with MongoDB database - (post, get, put & delete method used)

Dream Tour

[Live Website Link](#) || [Client-Side Code](#) || [Server-Side Code](#)

- Full-stack tour service booking website
- React, react-router, private-route, custom hooks, context API, API calling & firebase Google sign-in authentication system implemented
- Connected MongoDB to Express server for the backend management & used post, get, put, delete methods
- Fully responsive website and added an FAQ section

Medicare Plan

[Live Website Link](#) || [Client-Side Code](#)

- Public hospital website (front end development)
- Firebase password-based & Google authentication system implemented with react custom hooks
- React, react-router, private route, API calls & context API have been used in this project
- 100% responsive website for all screen size

SKILLS

- JavaScript(ES6), HTML5, CSS3, React, Node.js, Express.js, MongoDB
- Firebase Authentication (Password-Based Sign-Up & Sign-In, Google Sign-In, GitHub Sign-In)
- CSS Frameworks (Bootstrap, Tailwind CSS, Material-UI)
- Deployment (Firebase, Heroku, Netlify and GitHub)

LANGUAGES

- English (Fluent)
- Bangla (Native)
